This report includes all our research achievements of the calendar year 2021.
Our Research Areas

The Faculty of Business, Economics and Statistics has developed five interdisciplinary research areas that overcome the limitations of disciplines and bring together ideas and projects from different fields.

**CMI  Changing Markets and Institutions**

Transaction costs – costs caused by the exchange of goods and services in economic systems – are as important as costs caused by the production of those same goods and services. Efficient coordination of transactions in markets and companies through institutional design constantly offers new challenges for countries as well as for companies within an unwavering, further intensifying, global competition. The digitalisation of economic processes does not only change the scale (big data) but also the matter of economic transactions. Economic analyses and applications deal with the effectiveness of market imperfections and its control by governance structures and contractual incentive systems.

**CSP  Corporate Strategies and Processes**

Modern companies put an end to the traditional separation of strategy development by market and environment analysis and organisation development regarding the design of internal processes. This is replaced by a strategic management that, as a process, coordinates corporate structures and value-adding processes and takes into account the rapidly changing environmental conditions and internationality. Besides strategic management in particular, this research area also addresses technology and innovations management, supply chain and operations management as well as – caused by the advancement of digitalisation and the availability of big data – business analytics. Evidently, all other business disciplines as well as some economic disciplines (such as industrial organisation or labour economics) and interdisciplinary approaches (such as cooperative economics or sharing economy) are included in this research area as well.

**DSA  Data Science and Analytics**

In times of the availability of big data of nearly all societal domains and an ever increasing complexity of this data (high dimensional data), the development of suitable statistical methods, algorithms and appropriate optimisation methods is more urgent and important than ever. The demand for academically trained experts in data science and analytics on national and international labour markets is high. This results in challenges for the application field as well as for the latest methodological developments in statistics (analysis of high dimensional and heterogenic data, modelling, model selection and inference), operations research (optimisation and modelling) and quantitative and computer-assisted economics (business analytics, finance and applied econometrics). Applications are especially important for analysing currency, securities and energy markets, banks, insurances and their financial institutions, corporate finance of companies, as well as for logistics and operations management.

**HBE  Human Behavior and the Economy**

Human behaviour in economic decision-making is at the core of this research area. To be able to make predictions using business and economic models, it is necessary to make assumptions about human behaviour. In experimental economics, these assumptions and models are put to the test. This interplay between theoretical and experimental approaches allows for a more realistic model regarding human decision-making. The results of research conducted on this topic today provide the foundation for its application in nearly all disciplines at our faculty, ranging from the analysis of economic and regulation policies and behavioural finance to solving business issues, e.g. in marketing, strategy, organisation, personnel and economic sociology.

**MR  Management of Resources**

Resources – natural, human, financial and informational – are the foundation of economic activity. Their availability or shortage determines growth and development. Asymmetries in their distribution and privatisation caused by economic parties trigger strategic behaviour. Management of resources aims at the efficient use of resources in economic systems, on a societal as well as corporate level. Economic analyses and contributions focus on the growth and development of regions, sustainable environmental and energy policies and management, production and logistics within value-added chains, the design of educational and training systems as well as efficient information systems and their management.
Our Experts

On the following pages, we introduce our experts who conduct top-level research and teaching and build a centre of knowledge and expertise in the faculty’s research areas. We group our experts into tenured academic staff (professors and associate professors), emeritus/retired colleagues who still conduct research and/or teaching at our faculty and non-tenured academic staff (assistant professors, postdoctoral researchers, other).

We list our experts in the category they were associated with as of 31 December 2021. Researchers who left our faculty during the year 2021 are listed in the category they were last associated with.

Tenured Academic Staff

The following pages provide an overview of our academic staff who has a permanent contract. The list is organised in alphabetical order by last name. You can see the academic rank, i.e. (full) professor (Professor) or associate professor (Assoc. Prof.) as well as the department that the person is assigned to.

Ania Martinez, Ana Begona | Assoc. Prof.
Department of Economics

Auer-Zottlöterer (form. Auer-Srnka), Katharina | Assoc. Prof.
Department of Marketing and International Business

Blaschke, Sabine | Assoc. Prof.
Department of Economic Sociology

Bomze, Immanuel | Professor
Department of Statistics and Operations Research

Borrmann, Jörg | Assoc. Prof.
Department of Finance

Cuchiero, Christa | Professor
Department of Statistics and Operations Research

Cuñat, Alejandro | Professor
Department of Economics

Diamantopoulos, Adamantios | Professor
Department of Marketing and International Business

Dörner, Karl Franz (Vice Dean Teaching) | Professor
Department of Business Decisions and Analytics

Ehmke, Jan Fabian | Professor
Department of Business Decisions and Analytics

Fabel, Oliver | Professor
Department of Business Decisions and Analytics

Fuchs, Christoph | Professor
Department of Marketing and International Business

Gaunersdorfer, Andrea | Assoc. Prof.
Department of Finance

Gehrig, Thomas | Professor
Department of Finance

Gehrig-Merz, Monika | Professor
Department of Economics

Hartl, Richard | Professor
Department of Business Decisions and Analytics

Hautsch, Nikolaus | Professor
Department of Statistics and Operations Research

Hohenwarter-Mayr, Daniela | Professor
Department of Business Law

Janssen, Maarten | Professor
Department of Economics

Jirak, Moritz | Professor
Department of Statistics and Operations Research

Keber, Christian | Assoc. Prof.
Department of Finance

Keck, Steffen (with Tenure) | Assoc. Prof.
Department of Accounting, Innovation and Strategy

Kittel, Bernhard | Professor
Department of Economic Sociology

Klein, Irene | Assoc. Prof.
Department of Statistics and Operations Research

Kocher, Martin (on leave) | Professor
Department of Economics

Krivobokova, Tatyana | Professor
Department of Statistics and Operations Research

Kunst, Robert | Professor
Department of Economics

Küpper, Hans-Ulrich | Professor
Department of Accounting, Innovation and Strategy

Leeb, Hannes (Vice Dean Research) | Professor
Department of Statistics and Operations Research

Ljubic, Ivana (with Tenure, on leave) | Assoc. Prof.
Department of Statistics and Operations Research
Lóránt, Gyöngyi | Professor  
Department of Finance

Müller, Wieland | Professor  
Department of Economics

Novák, Andreas | Assoc. Prof.  
Department of Business Decisions and Analytics

Pfeiffer, Thomas | Professor  
Department of Accounting, Innovation and Strategy

Pichler, Paul (with Tenure) | Assoc. Prof.  
Department of Economics

Plakoyiannaki, Emmanuella | Professor  
Department of Marketing and International Business

Pötscher, Benedikt | Professor  
Department of Statistics and Operations Research

Rauner, Marion | Assoc. Prof.  
Department of Business Decisions and Analytics

Reisinger, Heribert | Assoc. Prof.  
Department of Marketing and International Business

Reitzig, Markus Georg | Professor  
Department of Accounting, Innovation and Strategy

Reschenhofer, Erhard | Assoc. Prof.  
Department of Statistics and Operations Research

Schachinger, Werner | Assoc. Prof.  
Department of Statistics and Operations Research

Schaffhauer-Linzatti, Michaela | Assoc. Prof.  
Department of Accounting, Innovation and Strategy

Schlag, Karl | Professor  
Department of Economics

Schmidt-Dengler, Philipp | Professor  
Department of Economics

Sorger, Gerhard (Dean) | Professor  
Department of Economics

Strobi, Günter | Professor  
Department of Finance

Tyran, Jean-Robert (on leave) | Professor  
Department of Economics

Vetschera, Rudolf | Professor  
Department of Business Decisions and Analytics

Weilinger, Arthur | Professor  
Department of Business Law

Zulehner, Christine | Professor  
Department of Economics

Retired & Emeritus Professors

Emeritus and retired professors have the opportunity to continue their research at our faculty as professorial or senior research fellows, respectively. The designation of their function is based on the respective professorship they held: Full university professors (emeriti) are referred to as professorial research fellows after their retirement, associate professors (retired) are referred to as senior research fellows. Below, we list retired and Emeritus professors, who were still associated with the faculty during 2021. They continued their work as lecturer (marked with *) and/or continued their research as professorial/senior research fellow at our faculty.

Emeritus professors

Pflug, Georg * | Professorial Research Fellow
Wagner, Udo * | Professorial Research Fellow
Wirz, Franz | Professorial Research Fellow

Retired Professors

Brazda, Johann *
Gutjahr, Walter * | Senior Research Fellow
Podczeck, Konrad * | Senior Research Fellow
Strauß, Christine *
Windsperger, Josef * | Senior Research Fellow
Non-Tenured Academic Staff

Below, we list non-tenured colleagues who are funded by regular university resources as well as externally funded personnel in alphabetical order by last name. Also, the departments/centres the faculty members are assigned to are specified.

In the section "Post-Docs" we list all faculty members of 2021 with a post-doc contract. Some of them are assistant professors who are on a so-called tenure track. This means that after fulfilling the qualification agreement, they are appointed as (tenured) associate professors. People on a tenure track are marked with *.

In the section "Other" we list academic staff who is not listed in the previous categories, but is associated with our faculty and has published scientific work or has contributed to research otherwise (e.g. as editor, organiser of conferences, etc.) in the year 2021.

Post-Docs

Aichholzer, Julian  
Department of Economic Sociology

Altenburger, Martin  
Department of Accounting, Innovation and Strategy

Ausserladscheider, Valentina  
Department of Economic Sociology

Bamieh, Omar  
Department of Economics

Boxtel, Anton van  
Department of Finance

Braune, Roland  
Department of Business Decisions and Analytics

Brausmann, Alexandra *  
Department of Economics

Buggle, Johannes Christoph  
Department of Economics

Chen, Si  
Department of Economics

Croner, Daniel  
Department of Economics

Debellis, Francesco  
Department of Marketing and International Business

Deng, Sheran  
Department of Finance

Dezső, Linda  
Department of Accounting, Innovation and Strategy, Vienna Center of Experimental Economics (VCEE)

Dmytriv, Solomiia  
Department of Statistics and Operations Research

Dragomir, Alina-Gabriela  
Department of Business Decisions and Analytics

Engin, Aysegül  
Department of Business Decisions and Analytics

Exler, Florian  
Department of Economics

Finocchio, Gianluca  
Department of Statistics and Operations Research

Garcia, Daniel *  
Department of Economics

González-Jimenez, Victor  
Department of Economics

Gonzato, Luca  
Department of Statistics and Operations Research

Griessmair, Michele  
Department of Economic Sociology

Heese, Carl  
Department of Economics

Hochmuth, Brigitte  
Department of Economics

Inwinkl, Petra  
Department of Accounting, Innovation and Strategy

Keilbar, Georg  
Department of Statistics and Operations Research

Knyazev, Dmitriy *  
Department of Business Decisions and Analytics

Koch, Christian  
Department of Economics

Kolm, Julian  
Department of Finance

Kramlinger, Peter  
Department of Statistics and Operations Research

Krneta, Nikolina  
Department of Accounting, Innovation and Strategy

Leduc, Justin  
Department of Economics
Leri, Ifigeneia
Department of Marketing and International Business

Leymarie, Jérémy
Department of Statistics and Operations Research

Makri, Aikaterini *
Department of Marketing and International Business

Mauring, Eeva
Department of Economics

Meissner, Felix
Department of Accounting, Innovation and Strategy

Micevski, Milena
Department of Marketing and International Business

Miernicki, Martin
Department of Business Law

Minaudier, Clement
Department of Economics

Montanari, Maria Gabriela
Department of Marketing and International Business

Neuhofer, Sabine
Department of Economic Sociology

Papariello-Svaluto-Ferro, Sara
Department of Statistics and Operations Research

Pauser, Sandra
Department of Marketing and International Business

Pohl, Mathias
Department of Statistics and Operations Research

Pothier, David
Department of Finance

Scherr, Yannick
Department of Business Decisions and Analytics

Schmid, Christian
Department of Accounting, Innovation and Strategy

Schräder, Stefanie
Department of Finance

Seidl, Andrea
Department of Business Decisions and Analytics

Sichtmann, Christina
Department of Marketing and International Business

Smirnova, Inna
Department of Accounting, Innovation and Strategy

Söckker, Ninja
Department of Business Decisions and Analytics

Steinberger, Lukas *
Department of Statistics and Operations Research

Szöcs, Ilona
Department of Marketing and International Business

Tang, Wenjie *
Department of Accounting, Innovation and Strategy

Tolvanen, Juha
Department of Economics

Vlachos, Stephanos
Department of Economics

Wagner, Alexander K.
Vienna Center of Experimental Economics (VCEE)

Wandschner, Kirsten *
Department of Economics

Westheide, Christian
Department of Finance

Williams, Cole
Department of Economics

Wimmer, Alexander
Department of Business Law

Wolf, Martin
Department of Economics

Wolfsteiner, Elisabeth
Department of Marketing and International Business

Xu, Yan
Department of Economics

Zejcicovic, Dijana
Department of Economics

Ziegler, Lennart
Department of Economics

Other

Amann, Nicolai
Department of Statistics and Operations Research

Archakov, Ilya
Department of Statistics and Operations Research

Baierl, Andreas
Department of Statistics and Operations Research

Benda, Frank
Department of Accounting, Innovation and Strategy/ Department of Business Decisions and Analytics
Castillo, Geoffrey  
Vienna Center of Experimental Economics (VCEE)

Domnanovich, Julia  
Department of Economic Sociology

Elting, Steffen  
Department of Business Decisions and Analytics

Gabl, Markus  
Department of Statistics and Operations Research

Galak, Oksana  
Department of Business Decisions and Analytics

Glaser, Matthias  
Department of Marketing and International Business

Grabenschweiger, Jasmin  
Department of Accounting, Innovation and Strategy

Grossmann, Wilfried  
Department of Marketing and International Business

Gruber-Német, Manuel  
Department of Economics 
Department of Statistics and Operations Research

Hajdini, Ilir  
Department of Business Decisions and Analytics

Halkias, Georgios  
Department of Marketing and International Business

Hansak, Alexander Paul  
Department of Economics 
Department of Statistics and Operations Research

Holzer, Magdalena  
Department of Business Law

Huber, Florian  
Department of Statistics and Operations Research

Jell-Ojobor, Maria  
Department of Business Decisions and Analytics

Kahr, Michael  
Department of Statistics and Operations Research

Kalleitner, Fabian  
Department of Economic Sociology

Kalk, Andrei  
Department of Economics

Kivaranovic, Daniel  
Department of Statistics and Operations Research

Klockmann, Karolina  
Department of Statistics and Operations Research

Knapp, Boris  
Department of Economics

Kotsis, Gabriele  
Department of Marketing and International Business

Külpmann, Philipp  
Vienna Center of Experimental Economics (VCEE)

Linsbichler, Alexander  
Department of Economics

Lutz, Flora  
Department of Economics

Mangat, Manveer  
Department of Statistics and Operations Research

Mladenow, Andreas  
Department of Marketing and International Business

Peitler, Philipp  
Department of Economics

Raha, Aveed  
Department of Business Decisions and Analytics

Roljic, Biljana  
Department of Business Decisions and Analytics

Sarasola, Briseida  
Department of Business Decisions and Analytics

Department of Economic Sociology

Tricoire, Fabien  
Department of Business Decisions and Analytics

Völz, Alexander  
Department of Marketing and International Business

Vogl, Petra  
Department of Business Decisions and Analytics

Warmuth, Julia Rita  
Department of Economic Sociology

Wolfinger, David  
Department of Business Decisions and Analytics
This section reports on our research that has been published in the calendar year 2021. Most of our research is published in learned journals. Journals are divided in three broad categories in which our best publications can be assigned to “Category 1” and “Category 2” according to our Faculty Journal List (see Appendix). Those publications that cannot be assigned to either one of the two categories are summarized as “Other Journal Publications”. Articles that have been accepted in learned Journals in the calendar year 2021 are listed as “Forthcoming”. Articles that are published in an online version before print are listed as “Online First”.

Category 1 comprises the very top 10% journals. Members of our faculty have published a total of 23 articles in such journals and 15 are assigned to the categories “Online First” and “Forthcoming”. Category 2 journals are among the top 25% of their fields or are named as very good in selected field-specific complementary lists. We count 33 publications in such journals and 13 in the category “Online First”.

Other journal articles and other publications such as monographs and contributions to collected volumes and proceedings are also listed below. We do not list working papers.

The publications are listed alphabetically by author(s). Our experts (as listed in the previous chapter) are marked in blue. We report the underlying field(s) of research according to the research areas defined on page 3.

**Theses Completed**

Our PhD education offers training and supervision that allows students to acquire knowledge and skills necessary for a research-oriented career in the core fields of our faculty. The successful completion of the PhD programme marks the entry into the scientific community and it shows the ability to carry out independent research. We congratulate the 9 PhD students who completed their theses in 2021.

Moreover, we proudly announce that one scholar has received the Venia Docendi: Pamela Nolz in Business Administration. The Venia is awarded for outstanding scientific qualifications and testifies to the scholars’ ability to hold lectures, teach and supervise students at all levels. The successful candidate has submitted a thesis that has been deemed methodologically sound, provides new scientific insights and demonstrates excellence in mastering the subject.

Editorial Work

Numerous members of our faculty – active as well as emeritus/retired – are engaged in editorial and publishing activities. In particular, many of our faculty members serve as editors, associate editors, or members of editorial boards of established journals. The list below shows who serves in which role for which journal. We do not list refereeing activities, as members of our faculty have, in total, most likely written several hundreds of these, and many of them serve as referees for prestigious journals.

**Category 1 Journals**

**Editor-in-Chief, Co-Editor**

Econometric Theory:
Pötscher, Benedikt (since 1995)

**Associate Editor**

Journal of Business and Economic Statistics:
Hautsch, Nikolaus (since 2015)

Journal of Consumer Research:
Christoph Fuchs (since 2021)

Journal of Marketing:
Christoph Fuchs (since 2020)

Operations Research:
Pflug, Georg (since 2012)

Transportation Science:
Hartl, Richard (since 2012)

**Editorial Board**

International Journal of Research in Marketing:
Christoph Fuchs (since 2014)

Journal of International Business Studies:
Diamantopoulos, Adamantios (since 2007)

Journal of Product Innovation Management:
Christoph Fuchs (since 2014)

Organization Science:
Reitzig, Markus Georg (since 2014)

Production and Operations Management:
Gutjahr, Walter (since 2015)

Strategic Management Journal:
Reitzig, Markus Georg (since 2013)

**Category 2 Journals**

**Editor-in-Chief, Co-Editor**

European Journal of Operational Research:
Bomze, Immanuel (since 2016)

International Journal of Industrial Organization:
Schmidt-Dengler, Philipp (since 2014)

Journal of Economic Psychology:
Kocher, Martin (since 2015)

OR Spectrum: Quantitative Approaches in Management:
Gutjahr, Walter (since 2014)

**Associate Editor**

British Journal of Management:
Plakoyiannaki, Emmanuella (since 2020)

Finance and Stochastics:
Cuchiero, Christa (since 2017)

Journal of Applied Econometrics:
Hautsch, Nikolaus (since 2015); Schmidt-Dengler, Philipp (since 2014)

Journal of Economic Dynamics and Control:
Sorger, Gerhard (since 2001)

Journal of Financial Econometrics:
Hautsch, Nikolaus (since 2012)

Journal of Money, Credit and Banking:
Lóránth, Gyöngyi (since 2016)

Journal of Statistical Planning and Inference:
Pötscher, Benedikt (since 2012)

Management Accounting Research:
Pfeiffer, Thomas (since 2016)

Mathematical Finance:
Cuchiero, Christa (since 2020)

OR Spectrum: Quantitative Approaches in Management:
Ehmke, Jan Fabian (since 2021)

**Editorial Board**

Computers & Operations Research:
Dörner, Karl Franz (since 2005); Vetschera, Rudolf (since 2002)
Computational Optimization and Applications:
Pflug, Georg (since 2000)

Experimental Economics:
Müller, Wieland (since 2014);
Tyran, Jean-Robert (since 2009)

Health Care Management Science:
Rauner, Marion (since 2006)

OR Spectrum: Quantitative Approaches in Management:
Vetschera, Rudolf (since 2019)

Other Journals

Editor-in-Chief, Co-Editor

Business Research:
Gehrig, Thomas (since 2015)

Central European Journal of Operations Research:
Dörner, Karl Franz (since 2011);
Pflug, Georg (since 2000);
Rauner, Marion (since 2007);
Vetschera, Rudolf (since 2004)

Empirical Economics: a quarterly journal of the Institute
for Advanced Studies, Vienna:
Kunst, Robert (since 2000)

EURO Journal on Computational Optimization:
Bomze, Immanuel (since 2019)

Flexible Services and Manufacturing Journal:
Dörner, Karl Franz (since 2016)

Homo Oeconomicus:
Kocher, Martin (since 2016)

Journal of Industry, Competition and Trade:
Schmidt-Dengler, Philipp (since 2018)

Marketing: ZFP – Journal of Research and Management:
Wagner, Udo (since 2009)

Schmalenbach Journal of Business Research:
Gehrig, Thomas (since 2021)

Statistics & Risk Modeling:
Pflug, Georg (since 2014)

Senior Editor

Management and Organization Review:
Plakoyiannaki, Emmanuella (since 2020)

Associate Editor

Bulletin of Economic Research:
Borrmann, Jörg (since 2006)

Central European Journal of Operations Research:
Bomze, Immanuel (since 2016);
Ehmke, Jan Fabian (since 2021);
Gutjahr, Walter (since 2011);
Hartl, Richard (since 2009)

Computational Management Science:
Pflug, Georg (since 2000)

Dynamic Games and Applications:
Sorger, Gerhard (since 2015)

Flexible Services and Manufacturing Journal:
Ehmke, Jan Fabian (since 2020)

Frontiers of Mathematical Finance:
Cuchiero, Christa (since 2021)

Group Decision and Negotiation:
Vetschera, Rudolf (since 2015)

International Game Theory Review:
Sorger, Gerhard (since 1999)

International Journal of Decision Support System Technology:
Vetschera, Rudolf (since 2015)

International Journal of Forecasting:
Hautsch, Nikolaus (since 2015)

International Marketing Review:
Sichtmann, Christina (since 2015)

Journal of Behavioral and Experimental Economics:
Kocher, Martin (since 2013)

Journal of Business Economics:
Fabel, Oliver (since 2008)

Journal of Computational Science:
Cuchiero, Christa (since 2018)

Journal of Economics:
Sorger, Gerhard (since 2005)

Macroeconomic Dynamics:
Sorger, Gerhard (since 2015)

Market Microstructure and Liquidity:
Hautsch, Nikolaus (since 2014)

Quantitative Finance:
Hautsch, Nikolaus (since 2019)

Statistical Papers:
Steinberger, Lukas (since 2020)

Stochastic:
Cuchiero, Christa (since 2021)

Stochastic Programming E-Print Series:
Pflug, Georg (since 2000)

Studies in Nonlinear Dynamics and Econometrics:
Sorger, Gerhard (since 2003)
**Editorial Board**

Akademija MM:
Wagner, Udo (since 2009)

Applied Economics Quarterly:
Gehrig-Merz, Monika (since 2002)

Austrian Journal of Statistics:
Pflug, Georg (since 2000)

Business Informatics:
Strauß, Christine (since 2017)

Business Research:
Dörner, Karl Franz (since 2014); Hartl, Richard (since 2007); Wagner, Udo (since 2007)

Econometrics:
Hautsch, Nikolaus (since 2012)

E-Journal Economics:
Gehrig, Thomas (since 2013)

Energy Journal:
Wirl, Franz (since 1993)

Energy Systems:
Pflug, Georg (since 2010)

EURO Journal on Decision Processes:
Gutjahr, Walter (since 2012); Vetschera, Rudolf (since 2012)

EURO Journal on Transportation and Logistics:
Hartl, Richard (since 2011)

European Journal of Marketing:
Diamantopoulos, Adamantios (since 2007)

Games:
Ania Martinez, Ana Begona (since 2010)

GES – Zeitschrift für Gesellschaftsrecht und angrenzendes Steuerrecht:
Hohenwarter-Mayr, Daniela (since 2010)

Health Systems:
Rauner, Marion (since 2012)

Industrial Marketing Management:
Sichtmann, Christina (since 2015)

International Business Review:
Plakoyiannaki, Emmanuella (since 2021)

International Journal of Economics and Business Research:
Borrmann, Jörg (since 2009)

International Journal of Operations Research and Information Systems:
Rauner, Marion (since 2010)

International Journal of Stochastic Analysis:
Pflug, Georg (since 2016)

International Marketing Management:
Sichtmann, Christina (since 2015)

International Marketing Review:
Diamantopoulos, Adamantios (since 2007)

International Transactions in Operational Research:
Vetschera, Rudolf (since 2010)

Journal of Behavioral and Experimental Economics:
Tyran, Jean-Robert (since 2013)

Journal of Business Market Management:
Sichtmann, Christina (since 2015)

Journal of Business Research:
Diamantopoulos, Adamantios (since 2007)

Journal of Contemporary Economic and Business Issues:
Wagner, Udo (since 2014)

Journal of Cross Cultural Marketing:
Wagner, Udo (since 2014)

Journal of Experimental Political Science:
Tyran, Jean-Robert (since 2013)

Journal of Global Optimization:
Bomze, Immanuel (since 2016)

Journal of International Marketing:
Diamantopoulos, Adamantios (since 2007)

Journal of Logistics Research:
Dörner, Karl Franz (since 2020)

Journal of Modelling in Management:
Diamantopoulos, Adamantios (since 2007)

Journal of Organization Design:
Reitzig, Markus Georg (since 2015)

Journal of Strategic Marketing:
Diamantopoulos, Adamantios (since 2007)

Journal of the Economic Science Association:
Müller, Wieland (since 2014); Tyran, Jean-Robert (since 2014)

Labour History Review:
Blaschke, Sabine (since 2008)

Lecture Notes in Economics and Mathematical Systems:
Pfeiffer, Thomas (since 2010)

Market-Tržišče:
Diamantopoulos, Adamantios (since 2017); Wagner, Udo (since 2013)

Operations Research for Health Care:

Externally Funded Research Projects

In this chapter we present our extensive research projects. The Faculty of Business, Economics and Statistics and its members engage in various research fields with multiple funding sources. Our biggest sponsors worth mentioning are the Austrian Science Foundation (FWF), the Austrian National Bank (OeNB) and the Christian Doppler Research Association (CDG). Funding as well as cooperation with other institutions and partners plays an essential part in our faculty’s aim to research a broad range of scientific issues.

**Externally Funded Individual Projects**

**Pricing in imperfectly competitive markets (Research Groups)**

Contact person(s): Daniel García, Maarten Janssen, Eeva Mauring, Philipp Schmidt-Dengler, Christine Zulehner (Research Group)
Research area(s): Changing Market and Institutions (CMI)
Funding body: FWF (Austrian Science Fund)
Funding: 1,362,667.00 €
2021 - 2026

Economists have formally studied pricing in imperfectly competitive markets since the mid-nineteenth century. By analyzing the potential inefficiencies of such markets, this research has guided regulatory and competition policy. With more and more transactions being shifted to online markets, research in this area remains highly relevant. The behavior of firms in imperfectly competitive markets is also studied in the management literature, with a stronger focus on strategies available to firms to become more profitable. Applications include bookings for hotel rooms, pricing of online airline tickets, as well as pricing in vertical contracts between firms.

This project brings together the economics and management literatures and studies pricing in imperfectly competitive markets both from an empirical and a theoretical perspective. Our analytical framework uses game-theoretic models to capture strategic behavior in imperfectly competitive markets. To carry out the empirical analysis, we resort to econometric methods. In doing so, we bring new tools to the study of classical questions. We also aim to tackle new issues related to online markets and algorithmic pricing. By interacting with competition authorities, the project also aims to deliver insights that are relevant for competition policy.

**Universal Structures in Mathematical Finance**

Contact person(s): Christa Cuchiero
Research area(s): Changing Market and Institutions (CMI)
Funding body: FWF (Austrian Science Fund)
Funding: 1,200,000.00 €
2020 - 2023

Universal structures in the sense of the current proposal pertain literally to both, finance and mathematics. On the financial side we mean robust empirical features that hold universally across different markets, asset classes and in particular over time. On the mathematical side it concerns universally appearing model classes and probabilistic properties, inherent in many at first sight unrelated phenomena. It is the purpose of this proposal to explore this mathematical and financial universality and to provide a unifying stochastic framework whose foundations have already been laid by the principal investigator and her co-authors in several works. In financial respect, the guiding universal structures are the stability of the capital distribution curves, as investigated in stochastic portfolio theory, and the rough volatility paradigm. Mathematically, it is on the one hand a generic non-Markovianity of at first sight naturally low dimensional objects, be it market capitalization or volatility. On the other hand mathematical universality appears in form of infinite dimensional affine or polynomial processes as well as McKean-Vlasov equations. It allows to treat universal phenomena from finance with universal stochastic methods. It is the first time that two major fields of mathematical finance, namely stochastic portfolio theory and contemporary stochastic volatility modeling, including multivariate rough and local stochastic volatility models, are considered from a common perspective. We believe that other areas in Mathematical Finance, for instance systemic risk, can be investigated in this new light. Beyond that we expect that the proposed work will lead to new insights in the theory of non-linear PDEs, McKean-Vlasov equations, SPDEs and infinite dimensional stochastic analysis.

**Distributive Preferences and Need-based Justice in Networks**

Contact person(s): Bernhard Kittel
Research area(s): Changing Market and Institutions (CMI), Human Behavior and the Economy (HBE)
Funding body: FWF (Austrian Science Fund)
Funding: 392,227.00 €
2018 - 2022

The Need-Based Justice and Distributive Procedures research group intends to contribute to a positive and informed normative theory of needs-based justice supported by experimental evidence. This theory aims to provide answers to four questions: (i) How do individuals identify needs and which distributions are considered sufficient for identified needs? (ii) Which distributions are collectively recognized and how is the process of recognition organized? (iii) Which dynamics does the process of collective recognition effectuate with regard to the stability of a political agreement? (iv) What are the consequences of the incentives at the collective and individual level and how sustainable are redistributive agreements? We expect the principle of need-based justice to minimise the tension between self-interested and strategically induced distributive preferences (social preferences) and ethically reflected principles of justice under two conditions: The recognition of needs takes place in a transparent way (social objectification) and available expert information is optimally used (factual objectification). Answers to the four questions are sought by drawing on two core hypotheses: The transparency hypothesis states that the individual and collective recognition of a distributive solution increases with the level of transparency of decision processes. In analogy, the expertise hypothesis states that the objectification of decisions to recognise needs by reference to expertise increases the acceptance of a distributive solution. Each of eight interdisciplinary sub-projects focuses on one of the four research questions from the perspective of one of the two hypotheses. Project B1 (Distributive Preferences and Need-Based Justice in Networks) uses a theory-driven experimental approach to study the recognition of needs as legitimate claims in the context of network structures and the consequences thereof on the outcome of bilateral distributional negotiations. Building on sociological network exchange theory, we analyse the effect of network structures, the transparency of structures for the actors involved, the number of possible bilateral agreements, and the social preferences of position holders concerning the observance of needs in distributional agreements. Assuming self-interested,
utility-maximising behaviour, equality in distributional outcomes tends to be generated by balanced power relations and information on the network structure. Unbalanced power networks, however, promote highly skewed distributions in which high-power positions are favoured. While this general pattern has been supported by repeated experiments, other network experiments reveal systematic deviations from these expectations. In particular, holders of structural power positions tend to act more pro-socially under certain conditions. The main research question is whether or not need-based justice, in contrast to other justice principles, is recognised as a distributive principle in network structures otherwise hostile to redistribution. A positive answer to this question would suggest that need-based justice principles have a higher potential to legitimise distributions than other principles.

Austrian Corona Panel

Contact person(s): Bernhard Kittel
Research area(s): Changing Market and Institutions (CMI), Human Behavior and the Economy (HBE)
Funding body: FWF (Austrian Science Fund)
Funding: 362,019.00 €
2020 - 2023

The SARS-CoV-2 pandemic has changed everyday life in Austria like in many other countries. Despite the pervasive exposure to the virus and the common confrontation with severe restrictions in public and private life, every individual, family, and household is affected differently. The project aims to analyze the ramifications of the crisis on individual life in Austria in the short and longer term. The project traces the variation and development in public moods, attitudes, behaviors and communication styles of the Austrian population over time and from a long-term perspective. It addresses questions such as: How do people cope with the threats to their health and economic livelihoods? What do people think of different measures and policies of pandemic containment? What are their views on measures to mitigate the economic crisis? What do people consider as a threat to democracy and the political system as such? How does the crisis change people’s communication patterns and social relationships? The study uses an online panel survey to collect repeated individual-level data representative of the Austrian population, fielded in monthly intervals.

Information Acquisition, Diffusion and Disclosure in Markets

Contact person(s): Maarten Janssen, Eeva Mauring, Daniel Garcia
Research area(s): Changing Market and Institutions (CMI), Corporate Strategies and Processes (CSP)
Funding body: FWF (Austrian Science Fund)
Funding: 342,349.00 €
2018 - 2021

Whether or not markets perform well in coordinating demand and supply depends to a large extent on the information agents possess. Often consumers need to acquire information about product characteristics and prices to be able to carefully compare the product offerings of different firms. Market power of firms depends on the information consumers have. If consumers are not informed about alternative prices, market power arises naturally as a consequence of the lack of information. On the other hand, firms may have incentives to reveal some of their private information. Information disclosure by firms may take the form of self-advertising, information provided by third party intermediaries or rating agencies. An important question in this regard is whether the information that firms directly or indirectly provide is verifiable or not. In the latter case, firms may lie about the information they provide and consumers must decide whether to trust the information or not. If information is non-verifiable, firms may not have an incentive to disclose information in the first place as the content may not be trusted by consumers.

Acquisition, disclosure and diffusion of information are clearly related. When few people acquire information, little information can be diffused, while if information is disclosed and disseminated efficiently, people may not have the incentive to incur a cost to acquire more information themselves.

This project brings together researchers at the economics department at the University of Vienna and researchers at the National Research University Higher School of Economics (Moscow). They will work on different subprojects where the relationship between information acquisition, disclosure and diffusion is explored. The project envisages to organize one workshop in Moscow and an international conference in Vienna.

Navigating Brand Preference through Consumers’ Stereotypes

Contact person(s): Adamantios Diamantopoulos, Arnd Florack
Research Theme: Human Behaviour and the Economy (HBE)
Funding body: FWF (Austrian Science Fund)
Funding: 342,349.00 €
2018 - 2021

This project focuses on three distinct kinds of stereotypes that are expected to influence consumer behavior, involving beliefs about the characteristics of (a) typical users of a certain brand (brand user stereotype), (b) different countries and their people (country-of-origin stereotype), and (c) different brands (brand stereotype). As the usefulness of stereotypes as explanatory constructs in consumer behavior is clearly dependent on their ability to boost perceptions of consumer value and/or mitigate perceived risk, this is one important issue examined in the project. Moreover, the extent to which the interplay between multiple consumer stereotypes is characterized by cross-national stability (or otherwise) will also be also assessed.

Josef Ressel Centre for Adaptive Optimisation in Dynamic Environments (JRC AdaptOp)

Contact person(s): Karl Franz Dörner
Research Theme: Data Science and Analytics (DSA), Management of Resources (MR),
Funding body: CDG (Christian Doppler Forschungsgesellschaft)
Funding: 331,904.00 €
Duration: 2019 - 2024
Abstract JRC: The Josef Ressel Centre for Adaptive Optimisation in Dynamic Environments (JRC AdaptOp) identifies new applications in dynamic real-world environments and aims at the development of planning approaches that can cope with continuously changing conditions. Dynamic optimisation problems (DOPs) in domains such as warehousing, production, and transportation are primarily addressed in this context. The workloads of gantry cranes, heavy-duty vehicles, and glass production lines are subject to optimisation. New DOPs within these domains will be formulated and new benchmarks will be created. The goal is to build a framework for open-ended adaptive methods, facilitating the detection of changes in the environment and the reaction to them. The integration of machine learning techniques to predict the occurrence of future events, devise potential future scenarios, and select and configure promising algorithms is also a major research focus. Finally, the methods’ performances will be studied and compared within controlled simulation experiments and evaluated within real-world test environments at the JRC’s industrial partners Industrie-Logistik-Linz GmbH (ILL), LiSEC Austria GmbH (LiSEC), Logistik Service GmbH (LogServ), and voestalpine Stahl GmbH (voestalpine).

Abstract external module of the University of Vienna: The University of Vienna, as an external module of the JRC, studies the transportation and intermediate storage of semi-finished casting products, so-called steel slabs, inside a steel-producing plant. Within the scope of intra logistical optimisation efforts, the research emphasis is threefold. First, solve a pickup and delivery problem that addresses the transportation of steel slabs as they pass multiple production stages, all of which are carried out at different locations inside the plant. Second, address the storage of work-in-process materials during the time they are buffered in large (outdoor) storage yards, waiting to be fed into the next stage of the production process. As the storage yards are organised in rows and function as two-dimensional stacking areas, consisting of stacks built up by steel slabs being located on top of each other, it is of utmost importance to ensure that the stacks remain organised while being manipulated during steel slab pickups or deliveries. Third, increase productivity by pre-marshalling slab yard stacks. This refers to the re-organisation of stacks such that varietal purity of stacks is maintained by making sure that slabs of a certain order or type are stored closely together in a desired sequence.

Logistics decision support in the pandemic

Contact person(s): Karl Franz Dörner, Immanuel Bomze
Research Theme: Corporate Strategies and Processes (CSP)
Funding body: FWF (Austrian Science Fund)
Funding: 274,921.50 €
2020 - 2022

Due to the CoViD-19 pandemic crisis, our daily life changed and will continue to be so. After the lockdown and the realization of shelter-in-place policies, the period of tracing paths of disease spread, warning people with potential high risk of infection, and to isolate infected people and people belonging to risk groups will follow. This new situation requires new or adapted logistical concepts: 1.) Isolated people require regular home deliveries. 2.) The containment strategy based on tracing will also lead to an increased demand in testing people for infections. The new aspects for all these planning problems are the additional constraints with respect to physical distancing. People need to reduce their physical interaction with others, the goods delivery people and the test team should work in homogeneous shifts. Furthermore, the shift plans have to be robust, as it can happen that some of the employees get infected and have to be quarantined.

Understanding Consumer Search

Contact person(s): Philipp Schmidt-Dengler, Daniel Garcia
Research area(s): Changing Market and Institutions (CMI), Corporate Strategies and Processes (CSP), Data Science and Analytics (DSA) Human Behaviour and the Economy (HBE)
Funding body: FWF (Austrian Science Fund)
Funding: 271,650.00 €
2018 - 2022

In most retail markets, consumers have to spend time and other resources in order to gather information about prices and other product characteristics. The process through which this information is gathered, referred to as the search protocol, has important implications for demand estimation and market structure. In this project we aim to introduce a new test that allows us to identify the protocol consumers use in the presence of learning and implement it using real-world web browsing data and online field experiment specifically designed for this question.

Understanding Social Mobility – An Experimental Approach

Contact person(s): Jean-Robert Tyran
Research area(s): Changing Markets and Institutions (CMI), Human Behaviour and the Economy (HBE)
Funding body: Jubiläumsfonds der österreichischen Nationalbank (OeNB)
Funding: 246,000.00 €
2021 - 2025

This project experimentally investigates the relevance of the following structural determinants of social mobility: the degree to which success is driven by luck rather than effort, discrimination, wage compression, and the degree of social stratification. We explore how different policy interventions such as income or inheritance taxes affect social mobility under varying structural conditions. We also investigate peoples’ acceptance of alternative policy measures by the means of of voting. We generate benchmark predictions that we put to a test in the economic laboratory.

Order Book Foundations of Price Risks and Liquidity: An Integrated Equity and Derivatives Markets Perspective

Contact person(s): Nikolaus Hautsch
Research area(s): Changing Markets and Institutions (CMI), Data Science and Analytics (DSA)
Funding body: FWF (Austrian Science Fund)
Funding: 243,201.00 €
2017 - 2021

Order Book Foundations of Price Risks and Liquidity: An Integrated Equity and Derivatives Markets Perspective

Contact person(s): Nikolaus Hautsch
Research area(s): Changing Markets and Institutions (CMI), Data Science and Analytics (DSA)
Funding body: FWF (Austrian Science Fund)
Funding: 243,201.00 €
2017 - 2021
Most financial markets are nowadays organized in the form of electronic limit order book markets. The introduction of electronic trading has substantially changed the trading landscape over the last decade. Many high-speed activities on financial markets are not well understood and are subject to concerns about market operators and regulators. This research will be the first project bringing together the limit order books (LOBs) of a stock market with those of derivatives written on this asset. Using empirical and statistical models the project will investigate the vast amount of information provided by integrated stock and derivative LOBs. This information will be processed to measure and predict risks associated with volatility, liquidity and price jumps. The project addresses two major research questions: First, can we exploit detailed LOB data of stocks and corresponding options to improve the measurement and prediction of volatility? Second, how does LOB information spill over from equity and derivative markets and how can this information be used to better understand the determinants of volatility, liquidity and jump risks on the micro level?

**EMIL: Exchange Mechanisms in Logistics**

Contact person(s): Rudolf Vetschera  
Research area(s): Changing Markets and Institutions (CMI), management of Resources (MR)  
Funding body: FWF (Austrian Science Fund)  
Funding: 237,220.20 €  
2021 - 2024

The concept of shared transportation resources, also denoted as collaborative vehicle routing, is one of the hot topics in transportation and logistics. This can be explained by the growth of the e-commerce sector, which boosts competition and brings down prices. A collaboration can be described as a partnership between two or more companies to optimize operations by making joint decisions and sharing information, resources, or profits. In this project, we are focusing on horizontal collaborations, in which companies at the same level of a supply chain are sharing resources through the exchange of selected requests with their competitors. The main aim of this project is to increase the overall efficiency of the transport industry, in particular by avoiding costly and pollutive empty trips. This will be achieved by improving both the planning processes of individual carriers, and the collaborative reallocation of transport requests to carriers, who are willing to enter collaborations with decentralized planning. In particular, we want to develop mechanisms for the reallocation of requests between carriers to obtain a fair and efficient allocation of such requests. The core of the project is in transportation research, and it makes heavy use of concepts and methods from operations research, game theory, and market design.

**Self-serving views on redistributive fairness**

Contact person(s): Linda Dezső, Jean-Robert Tyran  
Research Theme: Human Behaviour and the Economy (HBE)  
Funding body: FWF (Austrian Science Fund)  
Funding: 234,210.00 €  
2021 - 2023

Experimental research on distributive preferences reports that people prefer compensating low income through redistribution when it is due to factors one cannot control. However, there are situations where partners’ incomes were previously unequal, while in a new, present income allocation they receive equal outcomes. Only one paper examines a similar situation, finding that the person with the unfortunate history self-servingly believes that he is entitled to compensation for his past, while the person with the fortunate history believes that the past is irrelevant to the present. We propose an agenda investigating how history shapes distributive preferences, and the association between distributive fairness violations and unethical behavior. We argue that examining the relationship between history and distributive preferences sheds light, for example, on whether a fair welfare system should consider individual contribution history.

First, we ask if asymmetric contribution history to joint earnings leads to self-serving invocations of history between partners when proposing divisions. Second, we address whether partners sharing asymmetric initial income levels due to a previous allocation hold divergent views about the fair distribution of new, jointly created proceeds to which they contributed equally. We study the extent to which preferences for maintaining income hierarchy and inequality aversion (beyond greed) drive distributive preferences. Relatedly, we examine the association between imposing a distributive scheme on the rich and poor and subsequent unethical behavior. Imposed distributive schemes would systematically vary how much post-distribution rank is maintained/reversed and how income inequality is decreased/increased between them.

**Rechtsrahmen für Central Bank Digital Currencies in Österreich**

Contact person(s): Martin Miernicki  
Research area(s): Changing Markets and Institutions (CMI)  
Funding body: Jubiläumsfonds der österreichischen Nationalbank (OeNB)  
Funding: 216,000.00 €  
2021 - 2023

The research project deals with the legal framework for the potential emission of Central Bank Digital Currency by the OeNB or the ECB and highlights the need for reforms de lege ferenda. For this purpose, the research explores which types of CBDC the OeNB could introduce on its own or with the authorization of the European Central Bank as well as the steps necessary for the recognition as legal tender; liability risks for the OeNB and responsibilities with regard to personal data are discussed. Moreover, the project sheds light on the status of CBDC under Austrian private law (property, contractual relations) which includes an analysis of the relevant provision on the laws on consumer protection, rental contracts and employment relations. Furthermore, the status of CBDC under the supervision laws on AML/CTF, banking, payment services and securities as well as tax laws (income tax, VAT) is analyzed. Smart Contract applications (so-called programmable CBDC) are part of the research project.
Supranational climate-policy delegation

Contact person(s): Paul Pichler
Research area(s): Changing Market and Institutions (CMI), Human Behaviour and the Economy (HBE), Management of Resources (MR)
Funding body: FWF (Austrian Science Fund)
Funding: 210,010.00 €
2018 - 2021

International agreements to fight global warming in the past often had limited success or failed altogether, such as the Copenhagen Summit in 2009. Against this background, there have been recurrent proposals by academic researchers, policy advisors, and political commentators to create a supranational climate protection authority with the explicit mandate to fight global warming, and to delegate decision power over certain climate-relevant policies once and for all to this authority. Their argument is that an independent authority can implement necessary but painful climate-policy reforms much better than elected politicians, who are often driven by myopic re-election concerns. The aim of the proposed project is to better understand whether this argument in favor of a supranational environmental authority is indeed valid. We plan to carefully study if and when it may be economically beneficial for countries to delegate climate-relevant policies, and how such delegation would affect international climate policies. We plan to address these and other related questions within a theoretical economic model of climate policy, designed to capture the key trade-off between the economic benefits of energy conservation, investment into clean technologies for energy production, and environmental pollution costs. The proposed project is the first to develop a theoretical model of supranational climate-policy delegation and ask whether an independent supranational environmental authority could alleviate the pressing problem of global warming. It thereby contributes to an important discussion on the design of socio-economic institutions to guarantee sustainability of economic policies for the years to come.

Econometrics of Central Counterpart Risk

Contact person(s): Nikolaus Hautsch
Research Theme: Changing Markets and Institutions (CMI)
Funding body: FWF (Austrian Science Fund)
Funding: 209,370.00 €
2020 - 2023

A Central Clearing Party (or Central Counterparty or CCP) serves as the intermediary between the counterparties of a financial trade, is responsible for clearing and settlement and carries the counterparty risk during the settlement period. Since the 2007/2008 financial crisis, regulation in the U.S. and in Europe requires mandatory central counterparty clearing for all financial markets. Given the systemic importance of CCPs, surprisingly little research is performed on the quantification of CCPs’ risk exposure and the use of econometrics for efficient CCP risk management. In fact, an effective risk management of a CCP requires to account not only for the (time-varying) riskiness of the underlying instruments but also for (time-varying) correlations between instruments and member portfolios as well as trade-related risks due to intra-daily changes of members’ portfolio allocations.

In this project, we aim at developing and applying econometric tools for an efficient risk management of CCPs. The project has three major objectives: (i) Constructing and analyzing high-frequency based predictions of aggregated as well as member-based and instrument-based risk exposures and underlying correlation structures, (ii) quantifying trade-related risks due to changes in clients’ trading positions, and (iii) the development of adaptive margin buffers avoiding pro-cyclicality effects due to excessive margins.

Econometrics of Systemic Risk: Inference, Model Comparison and Network Dependencies

Contact person(s): Nikolaus Hautsch, Jérémy Leymarie
Research area(s): Data Science and Analytics (DSA)
Funding body: Jubiläumsfonds der österreichischen Nationalbank, Österreichische Nationalbank (OeNB)
Funding: 201,000.00 €
2021 - 2024

Monitoring the systemic riskiness of financial companies is a central requirement for macroprudential regulation and assuring financial market stability. Point estimates of systemic risk, however, are of limited use without reliable statistical inference. The latter is urgently required to be able to assess the significance of differences between systemic risk estimates of individual banks or differences in systemic risk rankings. Likewise, rigorous procedures to backtest and to perform comparisons between systemic risk forecasts are essential to operationalize systemic risk measures in financial regulation. Similarly, econometric frameworks for capturing causal dynamic and simultaneous dependencies in possibly high-dimensional bank networks are important to identify major channels of how tail risk is spread through the system. The project is decomposed into three main tasks. The first task is to develop statistical inference for popular systemic risk measures, like MES, SES, SRISK or DeltaCoVaR. We will derive corresponding asymptotic distributions semi-parametric-based inference in order to equip these measures with confidence intervals. This will allow us to make statements of the statistical reliability of systemic risk estimates. The second task is to propose a statistical framework for comparing systemic risk models. We will propose a class of loss functions which enables us to jointly elicit MES and VaR. This allows us to rank MES estimates arising from alternative econometrics models and to pursue rigorous backtesting of competing forecasts. The third task will bring together network-based systemic risk measures with multivariate dynamic models for quantiles. We will propose a unifying approach to model causal as well as simultaneous dependencies in possibly high-dimensional financial networks.

Classification – Preprocessed and high-dimensional data sets

Contact person(s): Lukas Steinberger
Research area(s): Data Science and Analytics (DSA)
Funding body: FWF (Austrian Science Fund)
Funding: 167,076.00 €
2021 - 2025

In this project we study classification based on two types of preprocessing designed for imbalanced and confidential data sets. We also investigate consequences of high-dimensional
features. Imbalanced data sets are known to significantly reduce the performance of classifiers in statistical learning which tend to be biased towards the majority class.

The second part of the project is concerned with classification based on training data satisfying a local differential privacy constraint. Differential privacy is an increasingly popular way to protect data owner’s privacy while enabling the extraction of valuable information about the population. Finally, we will investigate the performance of classification methods when feature vectors are high-dimensional and also explicitly include the numerical approximations used to practically implement those classifiers into the analysis. We will study the bias-towards-the-majority-class effect and will develop statistically efficient data reduction preprocessing within the majority class. We shall design new nonparametric classification algorithms which minimize this bias while not loosing power with respect to the misclassification error. Secondly, we shall quantify the necessary loss of prediction performance due to the local differential privatization and design optimal privacy mechanisms and corresponding classification algorithms.

In the third part, we will study the misclassification error of classifiers trained using numerical approximation schemes like SGD, in a high-dimensional framework. The problem of imbalanced data will mainly be approached by subsampling methods and penalized risk minimization based on novel, modified penalty terms. For private data analysis, we adopt a minimax perspective and adapt existing private minimax lower bounds to the classification context. Finally, for the analysis of stochastic algorithms in high-dimensional problems we will rely on random matrix theory and a Marchenko-Pastur type asymptotic framework.

Next to no theoretical analyses of classification problems with imbalanced data exist. The same holds true for minimax optimal classification under differential privacy. Finally, numerical algorithms to train classifiers are usually analyzed only for fixed feature dimension and as sample size increases. Thus, the results and methods we develop will be novel and highly relevant additions to the modern data analysts tool kit to deal with complex and high-dimensional data.

Supersmooth functional data analysis and PCA-Preprocessing

Contact person(s): Moritz Jirak
Research area(s): Data Science and Analytics (DSA)
Funding body: FWF (Austrian Science Fund)
Funding: 167,076.00 €
2021 - 2025

In this project, we study nonparametric regression and classification for functional data when the underlying regression functions and functional densities, respectively, are supersmooth. Based on a PCA-preprocessing technique, we anticipate polynomial convergence rates of the statistical procedures, which is in strong contrast to the usual asymptotics in nonparametric functional data analysis, where typically only logarithmic rates are available. For a thorough understanding of this phenomena, we aim to uncover the information theoretic complexity of this statistical problem and its interplay with the geometry of the underlying spaces. The second key objective is an early stopping procedure, intrinsically requiring our algorithm to learn an optimal selection of appropriate subspaces based on principal component approximations. In this context, we are particularly interested in computationally effective (sequential) procedures, also being robust with respect to heavy tails or dependencies. Moreover, the corresponding functional regression and classification problems shall be considered when no direct access to the data is available due to privacy constraints.

Paternity Leave: Monetary Incentives or Flexibility?

Contact person(s): Omar Bamieh, Lennart Ziegler, Christine Zulehner
Research area(s): Changing Markets and Institutions (CMI)
Funding body: Jubiläumsfonds der österreichischen Nationalbank (OeNB)
Funding: 159,000.00 €
2021 - 2023

Despite a large share of parental leave reserved for fathers in many countries, there is still a significant lack of fathers’ involvement in caring for their children. Austrian fathers are among those who take very little paternity leave. According to an OECD policy report from 2016, men account for just 4% of parents taking parental leave in Austria, compared to the 20% OECD average and 40% in Nordic countries. Given the potential gains for mothers and children from fathers taking parental leave, there seems to be room for improvement in Austria. While there exists a large literature on the determinants and effects of parental leave of women, less is known for leave of fathers. Most of the previous studies focus on the consequences for families of extending paternity leave. Our project also aims to examine which features of parental leave policies increase take up of fathers.

This project aims to provide new evidence on the determinants and consequences of paternity leave. Specifically, we analyze whether financial incentives and flexibility considerations can contribute to higher take-up rates of parental leave. Our empirical analysis exploits exogenous variation due to the 2008 and 2010 parental leave benefit reforms in Austria. While the former reform introduced options of much shorter leave schemes, the latter reform additionally established an income-dependent benefit schedule. A combination of both reforms allows us to estimate effects of more flexible leave schemes as well as higher income replacement rates on take up and duration of paternity leave. Furthermore, we analyze how induced changes in parental leave affect future labor market outcomes of fathers and mothers.

Disclosure Regimes and Information Systems in Banking

Contact person(s): David Pothier
Research area(s): Changing Market and Institutions (CMI)
Funding body: Jubiläumsfonds der österreichischen Nationalbank (OeNB)
Funding: 145,000.00 €
2021 - 2022

To further our understanding of current issues that are relevant for central banks’ financial stability mandate and the design of policies aimed at promoting a more efficient and resilient banking sector. The projects touch upon such
topics as disclosure requirements, information systems, bank lending and bank portfolio risk.

The first project, with the working title of Disclosure Regimes and Bank Risk-Taking aims to study how different disclosure regimes affect bank leverage, portfolio risk and funding liquidity. The project proposes to develop a novel model of bank capital structure in order to study these issues and analyse understudied interactions between bank disclosure requirements and capital regulation. The second project, with the working title of Information Systems and Bank Lending, focuses on how internal information systems affect banks lending behaviour and monitoring incentives. Both projects therefore broadly deal with issues relating to how information flows influence bank investment and risk-taking, the first project concentrating on information flows between bank insiders and outside investors, and the second project analysing information flows across hierarchical structures within banks.

Dynamic Uncertainty Modelling in Finance

Contact person(s): Irene Klein, Christa Cuchiero
Research area(s): Changing Market and Institutions (CMI)
Funding body: FWF (Austrian Science Fund)
Funding: 128,681.35 €
2019 - 2022

Since the beginning of the financial crisis in 2007, stability of financial markets has become a major topic attracting a lot of attention from experts in finance, economy and politics. In the field of mathematical finance, this led for instance to the emergence of a branch called “robust finance”, which aims at making financial modeling more solid in times of crises. The goal of this project is to establish two important aspects in this area: introducing dynamic modeling ideas and jointly capturing model risk and information risk. Mathematically, we incorporate model risk via so-called mixture-models and non-linear Markov processes. In both approaches parameter uncertainty and its dynamic nature due to incoming information is explicitly taken into account. In other words we accommodate the view that model risk is among other things a consequence of insufficient or even wrong information. This information risk is modeled via two filtrations. The smaller filtration contains the information actually available to market participants, while the larger filtration also includes (idealized) information on unobservable quantities. Prices are supposed to be adapted to the larger filtration, whereas actual observations can only be done in the smaller filtration, because of unreliable data sources and discrete and noisy signals. This allows us to go beyond the usual assumptions taken in mathematical finance – for example, price processes do not need to be semimartingales any longer. In this general two-filtration setup in continuous time we analyze all foundational questions, like fundamental theorems, superhedging, stochastic integration and model calibration.

Our main field of application are fixed income markets with multiple yield curves, which became due to the financial crisis highly important. These markets are a prototypical example of the mathematical modeling setup within which we aim to lay the theoretical foundations to answer questions of model calibration, pricing and hedging.

Why are refugees perceived as threat?
Moral-emotional foundations of threat perception

Contact person(s): Michele Griessmair
Research area(s): Human Behaviour and the Economy (HBE)
Funding body: Jubiläumsfonds der österreichischen Nationalbank (OeNB)
Funding: 100,000.00 €
2021 - 2022

In 2016, Europe faced the arguably largest refugee challenge since World War II. Solving such refugee challenges requires cooperation on a national and international level, but politicians and the population are strongly divided on the issue. Immigration and refugee influxes have been a central topic in politics and the public debate for decades, including during the 2016 U.S. presidential elections, in which immigration was a fiercely disputed issue that polarized the country over travel bans, illegal immigration, a border wall, and limiting the refugee intake. Thus, the question why some people perceive refugees and immigrants as threat while others welcome them is a central area of inquiry with important theoretical and practical implications.

Prior research investigating the factors underlying attitudes towards refugees and immigration has focused on individuals’ political orientation and national group identity, sociodemographic characteristics such as age, gender, and educational attainment, immigrants’ ethnicity and country of origin, host country characteristics, and personality traits and attitudes, chief amongst them authoritarianism. Based on social intuitionist models, the current proposal investigates implicit moral-emotional responses as novel explanation for attitudes towards refugees. We propose that the degree to which individuals perceive refugees as threat to their culture or material well-being is strongly influenced by two antagonistic evolutionary sets of moral intuitions and related emotions – binding foundations and the propensity to experience disgust vs. individualizing foundations and the propensity to experience guilt, shame, and empathy. This would imply that the judgement of whether refugees constitute a threat is driven by reflexive, implicit emotional responses making the judgement more akin to an unconscious, automatic process rather than deliberate reasoning. This line of argumentation “differs dramatically from traditional research on political threats, which tends to highlight the impact of cognitively based perceptions” (Brader et al., 2008: 960) and may also explain the politicization of the refugee influxes and the vitriolic nature of the discussion.

On the Theory and Testing of Changing Choice Behavior

Contact person(s): Karl Schlag, Philipp Peitler
Research area(s): Human Behaviour and the Economy (HBE)
Funding body: Jubiläumsfonds der österreichischen Nationalbank (OeNB)
Funding: 99,000.00 €
2021 - 2023

In experimental economics, it is usually assumed that a subject’s decision-making behaviour does not change in the course of the experiment. This restriction can lead to the economist mistakenly interpreting the subject’s behaviour as a violation of a decision theory. On the other hand, assuming
that behaviour can change arbitrarily makes falsification of the decision theory impossible. In this project, we develop a model in which decision behaviour can change, but which allows testable predictions. Furthermore, we conduct an experiment to test whether decision behaviour actually changes in the course of the experiment.

**Essays on Distributional Macroeconomics – three interrelated projects studying the role of inequality and the distributional effects of several macroeconomic channels**

Contact person(s): Philipp Schmidt-Dengler, Alexander Paul Hansak
Research area(s): Human Behaviour and the Economy (HBE)
Funding body: Austrian Academy of Sciences (ÖAW)
Funding: 77,000.00 €
2021 - 2023

Over the past few decades several countries have experienced an increase in inequality of wealth and income. Economic outcomes can lead to highly unequal distributions, but while this fact often spurs new debates among policy makers and the general public, it has long been neglected by macroeconomic models. Only since the early 2000s has the incorporation of explicit heterogeneity led to the emergence of models which try to explain why some people are rich, while others are poor. Especially due to the availability of high-quality micro-data and the development of powerful computational methods have such heterogeneous agent models become widely used. Hence, nowadays there exist several studies showing how “inequality matters for macro and macro matters for inequality”. My dissertation consists of three interrelated projects studying the role of inequality and the distributional effects of several macroeconomic channels.

I want to contribute to the existing literature by shedding light on different phenomena and by using quantitative macroeconomic models to produce new insights. The first chapter is concerned with the distributional effects of tax evasion and the implications of incomplete tax compliance on macroeconomic aggregates. Thus, I introduce tax evasion into a general equilibrium model with heterogeneous agents who can invest in intermediate goods and pay taxes on their realized gains. A preliminary solution of the model shows how tax evasion leads to higher inequality and that despite these considerable distortionary effects capital income taxation is still desirable. I in the second project I then plan to analyze whether the observed rise in inequality causally lead to an increase in household debts. If households feel like their are losing out, they are inclined to hold higher debts in order to keep up with the rest. This ‘keeping up with the Joneses’ effect is lacking in the quantitative literature so far. Consequently, I set up an overlapping generations model with consumption externalities where individuals compare their own utility with a reference group. Moreover, I will allow for bankruptcy to occur in equilibrium and hence, higher debt holdings will also lead to higher loan prices. Lastly, in the third chapter I want to study credit markets where creditors can shroud add-on prices into an incomplete markets model, which will allow to assess several regulatory policies, including the Credit CARD Act of 2009.

**Manipulative Experts, Naive Consumers, and Their Search for Information**

Contact person(s): Maarten Janssen, Boris Knapp
Research area(s): Human Behaviour and the Economy (HBE)
Funding body: Austrian Academy of Sciences (ÖAW)
Funding: 77,000.00 €
2020 - 2022

Online markets rely on reviews. Internet platforms with user generated reviews – like Amazon or Yelp – are meant to distribute knowledge among consumers and thereby reduce the asymmetry of information between buyers and sellers. These platforms, however, are subject to issues that undermine this objective. One important impediment is the presence of fake reviews. It is well documented that some sellers create reviews themselves in order to boost demand. Consumers typically cannot tell fake reviews apart from organic ones (which is the whole point of creating fake reviews). Those who are aware that reviews can be fraudulent – the sophisticated consumers – can account for it buy being more cautious. Those who are unaware of the other hand – the naive ones – are easily deceived. My dissertation focuses on the acquisition of information in such markets. In the first chapter of my thesis I analyze a theoretical model to gain insights into how consumer naivete is linked to information transmission and ultimately consumer welfare. I use these insights to evaluate the effects of educational policies. Analyzing review data from Amazon I provide supportive evidence for my findings. The second chapter consists of an experiment that tests the theoretical predictions from chapter one. Empirical issues impede a convincing analysis based on field data alone. In contrast to that, the controlled environment of the lab allows for reliably isolating and identifying the effects of interest. As this project is at an early stage we have not yet applied for approval by the Ethics Commission. After consultation with experienced researchers in the field we are very confident that the Commission will not object because no unconventional methodology is applied and subjects are not harmed in any way. An implicit assumption of the previous chapters is that information acquisition is given. In reality, however, a consumer decides whether and how much information to acquire. The third chapter examines consumers’ search behaviour explicitly by building on the theoretical framework introduced in chapter one. Although the thesis has a narrow thematic focus it is methodologically diverse. Studying information acquisition from a theoretical, empirical, and experimental perspective allows for a thorough understanding of the questions at hand.

The distribution of tenant benefits in Austrian social housing

Contact person(s): Ana Begona Ania Martinez
Research area(s): Human Behavior and the Economy (HBE)
Funding body: Jubiläumsfonds der österreichischen Nationalbank (OeNB)
Funding: 58,000.00 €
2020 - 2022

Funding body: Austrian Academy of Sciences (ÖAW)
Funding: 31
Social housing is expected to be one of the focal political issues in the next Viennese election in 2020. In particular, the issue of eligibility is now becoming the target of public debate. In the current public housing programs in Austria, eligibility is only checked when a family applies for subsidized housing and the upper income limits are quite generous compared to other European countries. This regularly raises the question whether subsidization is really targeting those who need it most. The topic is of pressing societal and political relevance, given the recent developments of the Austrian housing market.

The present project attempts to contribute to the evaluation of current social housing programs in Austria. Our aim is to provide monetary measures of the impact of social housing on the living standards of tenants and estimate the associated dead weight loss of provision using SILC data. It has been suggested and it is becoming a matter of heated political discussion, that income eligibility should be regularly checked and the rents of less needy families should be appropriately increased. Our estimates would allow to get some insight on the benefit distribution according to household characteristics, like income or family size, as well as the possibilities for rent adjustments without disrupting the desire for social cohesion.

**Ulysses Contest – Digital Student Competition on Family Business**

Contact person(s): Emmanuella Plakoyiannaki
Research area(s): Corporate Strategies and Processes (CSP), Human Behavior and the Economy (HBE)
Funding body: European Commission
Funding: 31,085.00 €
2021 - 2023

ULYSSES has been designed to become the 1st fully digital European student competition that focuses entirely and explicitly on family businesses (FB). To put this endeavor into practice, we will build up sustainable and regionally embedded university-industry interaction networks that input structurally well-prepared and complex real business challenges into a digitally based student competition – the Ulysses Contest. We will do so on the basis of an innovative virtual learning and teaching platform that will be tailored to the functional needs of the student contest as well as to the individual user-groups (students, educators, family business stakeholder) requirements. As such, our project will drive change for the benefit of a new form of digitally integrated entrepreneurship education within the partners institutions and beyond.

**International Business – Strategies for Integrated Europe**

Contact person(s): Rudolf Vetschera
Co-Project Manager: Oksana Galak
Research area(s): Corporate Strategies and Processes (CSP), Management of Resources (MR)
Funding body: European Commission
Funding: 30,000.00 €
2020 - 2023

European integration created the environment with unique opportunities, but also with distinctive challenges for the European companies. Globalization, political changes of the last 60 years, liberalization of trade, labor and investment flows, as well as the growth of IT influenced all countries of the world, but probably were the most pronounced in the European Union. How did real sector respond to these changes? What does it take to be a successful business in the EU? What are the prospects for EU companies in the next decades?

These questions need to be raised and discussed today with those young people who will create a backbone of the economic growth in the next decades, as the success of the EU, both as an economic and political union, will to a large extent depend on their success as entrepreneurs, business leaders, policy makers and engaged eurocitizens.

Our primarily focus in this project is on master level students of the economic and business specialization of the University of Vienna – the largest educational institution in Austria.

**Discrimination and Fostering Trust**

Contact person(s): Wieland Müller
Research area(s): Human Behavior and the Economy (HBE)
Funding body: Diligentia Foundation for Empirical Research
Funding: 20,000.00 €
2019 - 2022

Most of the literature surrounding the economics of discrimination has focused on eliciting preferences for discrimination and low trust through one-shot games. But this is where the existing literature has basically stopped – at highlighting the problem. Our goal is to take the next step by investigating simple yet potentially powerful solutions to the problem of low trust arising from ethnic discrimination with subjects from the general population. Given that discrimination is on the rise due to more ethnically diverse societies, the resulting low trust has become a pressing issue that begs solutions, lest it hampers economic progress. To the best of our knowledge, no other work has focused on engineering trust when there is discrimination. There has been much research into fostering trust, but not particularly in the presence of discrimination. This is the conceptual novelty of our proposed research.

**Consulting for "Randomized Control Trial"**

Contact person(s): Wieland Müller
Research area(s): Management of Resources (MR)
Funding body: FFG (Austrian Research Promotion Agency)
Funding: 15,500.00 €
2019 - 2021

As part of this project we consulted the FFG (Austrian Research Promotion Agency) to set up a randomized control trial (RCT) to "test if easy scalable support measures (a combination of mentoring and software tools) are able to increase the innovation capacity in SMEs (small and medium-sized enterprises)."
Graduate Schools

VGSCO  
Vienna Graduate School on Computational Optimization

Contact person(s): Immanuel Bomze, Radu Ioan Bot, Monika Henzinger, Arnold Neumaier  
Partner institutions: Faculty of Mathematics, Faculty of Computer Science, Vienna University of Economics and Business (WU), Vienna University of Technology (TU), Institute of Science and Technology Austria (IST)  
Research area: Data Science and Analytics (DSA)  
Funding body: FWF (Austrian Science Fund)  
Funding: 2,056,866.00 € (total funding of project)  
2020 - 2024 (2nd funding period)

The Vienna Graduate School on Computational Optimization (VGSCO) is a joint initiative between the Faculty of Business, Economics and Statistics, the Faculty of Mathematics and the Faculty of Computer Science (all 3 of University of Vienna), the Vienna University of Economics and Business (WU), the University of Technology Vienna (TU) and the Institute of Science and Technology Austria (IST) funded by the Austrian Science Funds (FWF). The Vienna Graduate School on Computational Optimization offers lecture series given by international experts in optimization related fields, organizes research seminars, retreats, soft skills courses, scientific workshops, and social events, provides travel grants, and supports research stays abroad. The short-time goal of the research and training programme of this Graduate School (DK+ programme) is to give the PhD candidates a comprehensive training in optimization with special emphasis on algorithmic and computational aspects as well as to prepare them for a scientific career by introducing them into the scientific networks of the participating scientists. The structure of the programme also allows to study the relations between different areas of optimization. In the long term we will foster collaboration between the members and their respective institutions in order to make Vienna a place of excellence in Computational Optimization. The first funding period ended in spring 2020; an extension of funding has been successfully applied for. The VGSCO is now run by the Faculty of Mathematics, but our faculty is still involved.

VGSE  
Vienna Graduate School of Economics

Contact person(s): Maarten Janssen, Philipp Schmidt-Dengler  
Research area(s): Changing Market and Institutions (CMI), Human Behavior and the Economy (HBE)  
Funding body: FWF (Austrian Science Fund)  
Funding: 1,673,967.99 €  
2010 - 2015  
2017 - 2023

VGSE offers a challenging and rigorous PhD programme in economics. The school aims at attracting the very best students from Austria. Students train to become independent researchers and teachers. The faculty members associated with VGSE are recognized by their peers as experts in their respective fields and are well connected to the international research community. The research areas of the faculty involved are closely interrelated, and together span both theoretical and applied topics that are of interest to PhD students. Students obtain full funding to spend most of the three years on research for their dissertation. They present their research in internal seminars attended by their peers and VGSE faculty as well as international conferences. They defend their dissertation before a committee including external faculty. Successful graduates from VGSE take academic jobs, or high level positions government and international organizations, as well as the private sector.

VGSF  
Vienna Graduate School of Finance

Contact person(s): Thomas Gehrig, Nikolaus Hautsch, Gyöngyi Lóránth, Günter Strobl  
Partner institutions: Vienna University of Economics and Business (WU) & Institute for Advanced Studies (IHS)  
Research area: Changing Market and Institutions (CMI)  
Funding body: FWF (Austrian Science Fund)  
Funding: 554,565.00 € (per rate share of University of Vienna)  
2018 - 2022 (5th funding period)

The VGSF is a joint doctoral school of the University of Vienna, WU and the Institute of Advanced Studies (IHS). The VGSF offers a well-structured, top-notch PhD programme in Vienna since 2005. It has been a pioneer in structured doctoral education establishing the first doctoral school social sciences in Austria funded by the FWF. It builds on the core principles of inter-institutional cooperation, co-education and co-supervision and recruits its students internationally. The faculty members are part of a widely recognized international network and leading scholars are invited to teach courses or to present their research in seminars. The focus of research is on asset pricing, market microstructure, corporate finance and financial intermediation. The programme is entirely run in English. VGSF has an excellent track record with placements at University of Chicago, MIT, Georgia Tech, University of Wisconsin, University of Amsterdam, Aarhus University, BI Norwegian Business School, University of Oslo, University of Copenhagen, Humboldt University, University of Odense, Hong Kong University, University of Calgary, Swiss Finance Institute and many more.

OMDS  
Oskar Morgenstern Doctoral School

The University of Vienna and the faculty of Business, Economics and Statistics strive to offer top-notch education to our PhD candidates. Currently, the faculty explores the possibility to integrate all its PhD programmes in a single doctoral school, the Oskar Morgenstern Doctoral School.
Research Achievements 2021

Dissemination of Research

This section lists activities in disseminating, discussing and debating research by our faculty members, starting with talks by speaker(s) in chronological order. We then state workshops that have been (co-)organised by members of our faculty, as well as presentations in one of our seminar series. We close this section by indicating awards and fellowships received in 2021. Please note: Due to the COVID-19-pandemic and the associated travel registrations, many participations at international conferences and research visits had to be postponed or held online.

Mauro Costantini (Contributor) & Robert Kunst (Speaker)
20 Dec 2021

Workshops and Conferences

Fincap Academy
Anna Dreber (Organiser), Thomas Gehrig (Participant), Felix Holmeister (Organiser), Jürgen Huber (Organiser), Magnus Johannesson (Organiser), Michael Kirchler (Organiser), Albert Menkveld (Organiser), Sebastian Neusüß (Organiser), Michael Razen (Organiser), Utz Weitzel (Organiser) & Christian Westheide (Participant)
1 Jan 2021 - 31 Dec 2022

2021 AEA/ASSA (virtual) Annual Meeting
Kirsten Wandschneider (Participant)
5 Jan 2021 - 7 Jan 2021

Consumer Search Digital Seminar Series
Maarten Janssen (Organiser)
3 Feb 2021 - 12 May 2021

XV. Hochschulsymposium der Schleyer Stiftung
Thomas Gehrig (Advisor)
17 Feb 2021

Seminar on Machine Learning in Finance
Christa Cuchiero (Organiser) & Sara Papariello-Svaluto-Ferro (Organiser)
1 Mar 2021 - 30 Jun 2021

Committee for Industrial Economics
Oliver Fabel (Participant)
18 Mar 2021 - 19 Mar 2021

Stochastic processes & their friends
Florian Huber (Participant)
18 Mar 2021 - 19 Mar 2021

Annual Conference of the Swiss Financial Market Research Society (SGF 2021)
Thomas Gehrig (Panel chair)
25 Mar 2021 - 26 Mar 2021

2021 Swiss Winter Conference on Financial Intermediation
Thomas Gehrig (Advisor)
28 Mar 2021 - 31 Mar 2021

Vienna Workshop on “Econometrics of Options Markets”
Nikolaus Hautsch (Participant)
19 Apr 2021

Mitgliederversammlung des Ausschusses für Unternehmenstheorie und -politik
Oliver Fabel (Participant)
23 Apr 2021

Stochastic Analysis Afternoon 2021
Florian Huber (Participant)
5 May 2021 - 6 May 2021

Sitzung der Herausgeber des Journal of Business Economics/der Zeitschrift für Betriebswirtschaft
Oliver Fabel (Participant)
10 May 2021

European Accounting Association 2021 Virtual Congress
Nikolina Krneta (Presenter)
26 May 2021 - 28 May 2021
SPDEs & friends
Florian Huber (Participant)
31 May 2021 - 2 Jun 2021

3rd Warsaw-Money-Macro-Conference
Thomas Gehrig (Panel chair)
3 Jun 2021

5th Vienna Workshop on High-dimensional Time Series in
Macroeconomics and Finance - A tribute to Manfred Deistler"
Benedikt Pötscher (Organiser)
10 Jun 2021 - 11 Jun 2021

North American Summer Meeting of the Econometric Society
Thomas Gehrig (Panel chair)
11 Jun 2021

After Capitalism - Micro- and macro-institutional conditions
of transformation
Julia Domnanovich (Participant)
14 Jun 2021 - 18 Jun 2021

Young Researchers Between Geometry and Stochastic
Analysis 2021
Florian Huber (Participant)
16 Jun 2021 - 18 Jun 2021

20th Annual SAET Conference
Nina Bobkova (Presenter), Carl Heese (Organiser),
Joseph Root (Presenter) & Juha Tovlanen (Presenter)
17 Jun 2021

Summer School on International Trade
Manuel Gruber-Német (Participant)
21 Jun 2021 - 25 Jun 2021

Stochastic Analysis and Hermite Sobolev Spaces
Florian Huber (Participant)
21 Jun 2021 - 26 Jun 2021

2021 World Meeting of the International Society for
Bayesian Analysis
Karolina Klockmann (Participant)
21 Jun 2021 - 2 Jul 2021

EURO 2021 European Conference on Operational Research
Rudolf Vetschera (Organiser)
11 Jul 2021 - 14 Jul 2021

NBER Summer Institute 2021
Thomas Gehrig (Participant)
16 Jul 2021 - 17 Jul 2021

Hausdorff School "High-Dimensional Statistics"
Hannes Leeb (Presenter)
26 Jul 2021 - 30 Jul 2021

World Finance Conference 2021 (Kristiansand)
Thomas Gehrig (Advisor)
3 Aug 2021 - 5 Aug 2021

5th SAFE Market Microstructure Conference
Christian Westheide (Organiser)
23 Aug 2021 - 25 Aug 2021

European Finance Association 2021
Thomas Gehrig (Advisor)
25 Aug 2021 - 28 Aug 2021

14th European Summer School in Financial Mathematics
Florian Huber (Participant)
30 Aug 2021 - 3 Sep 2021

Stochastic Processes, Analysis and Semigroups
Florian Huber (Participant)
31 Aug 2021 - 2 Sep 2021

International Conference on Operations Research
Andrea Gaunersdorfer (Panel chair)
31 Aug 2021 - 3 Sep 2021

Bath Mathematical Symposium on PDE and Randomness
Florian Huber (Participant)
1 Sep 2021 - 10 Sep 2021

Noncommutative algebra, probability and analysis in action
Florian Huber (Participant)
20 Sep 2021 - 21 Sep 2021

32nd International Conference on database and Expert
Systems Applications (DEXA)
Christine Strauß (Advisor)
27 Sep 2021 - 30 Sep 2021

32nd International Conference on database and Expert
Systems Applications (DEXA)
Christine Strauß (Presenter)
30 Sep 2021

CSH Workshop: "Stochastic Dynamics for Complex Systems"
Florian Huber (Participant)
30 Sep 2021 - 1 Oct 2021

DGF Conference 2021
Thomas Gehrig (Advisor)
1 Oct 2021 - 2 Oct 2021

Possibilities and Limits of State Aid Law in the Field of
Tax Law
Daniela Hohenwarter-Mayr (Presenter) &
Sabine Kirchmayer-Schliesselberger (Presenter)
7 Oct 2021

Krisenresilienz der Wirtschaft
Kirsten Wandschneider (Participant)
12 Oct 2021

10th Workshop on Banks and Financial Markets
Thomas Gehrig (Organiser), Michael Koetter (Organiser),
Thilo Pausch (Organiser) & Peter Welzel (Organiser)
21 Oct 2021 - 22 Oct 2021

Meeting of the Working Group Operations Research in Health
Care and Disaster Management of the Austrian Society of
Operations Research (ÖGOR)
Walter Gutjahr (Organiser), Patrick Hirsch (Organiser),
Marion Rauner (Organiser), Margit Sommersguter-Reichmann
(Organiser) & Tina Wabolbinger (Organiser)
5 Nov 2021
Higher Structures Emerging from Renormalisation  
Florian Huber (Participant)  
8 Nov 2021 - 19 Nov 2021  

Simulation, Prognose und Optimierung: Wie unterstützen Daten die Entscheidungsfindung?  
Jan Fabian Ehmke (Presenter)  
30 Nov 2021  

20. FDIC-JFSR Annual Conference  
Thomas Gehrig (Participant)  
1 Dec 2021 - 3 Dec 2021  

Ethics of Business, Trade and Global Governance  
Thomas Gehrig (Organiser)  
3 Dec 2021 - 4 Dec 2021  

Mitgliederversammlung des Vereins für Socialpolitik  
Oliver Fabel (Participant)  
8 Dec 2021  

NBER-Conference Big Data and Securities Markets  
Thomas Gehrig (Participant)  
10 Dec 2021 - 11 Dec 2021  

4th Conference on Contemporary Issues in Banking  
Thomas Gehrig (Participant)  
13 Dec 2021 - 14 Dec 2021  

World Finance & Banking Symposium 2021  
Thomas Gehrig (Advisor)  
17 Dec 2021 - 18 Dec 2021  

15th International Conference on Computational and Financial Econometrics (CFE-CMStatistics 2021)  
Christa Cuchiero (Panel chair)  
18 Dec 2021 - 20 Dec 2021
Seminar Series

Our seminar series are platforms to discuss recent and ongoing research. The exchange of ideas takes place in a more or less informal atmosphere. A brown-bag seminar is more informal and ideal to discuss new ideas and work in progress while senior researchers tend to present polished papers in a departmental seminar. Our seminar series are organised and funded by our departments and centres.

Vienna Joint Economic Seminar

Market Size, Innovation, and the Economic Effects of an Epidemic
Pietro Paretto (Duke University) – joint with Dommenico Ferraro
4 Mar 2021

Owning Up: Closely Held Firms and Wealth Inequality
Alessandra Peter (IIES, Stockholm)
11 Mar 2021

Structural Estimation in Complex Dynamic Environments
Niccolò Lomys (Toulouse School of Economics) – joint with Lorenzo Magnolfi and Camilla Roncoroni
18 Mar 2021

Do the Rich Flee Wealth Taxes? Evidence from Scandinavia
Camille Landais (LSE, London) – joint with Katrine Jakobsen, Henrik Kleven and Jonas Kolsrud
25 Mar 2021

Preventing Child Maltreatment: Beneficial Side Effects of Public Childcare Provision
Libertad González (UPF, Barcelona) – joint with Malte Sandner and Stephan L. Thomsen
15 Apr 2021

Disability Insurance: Error Rates and Gender Differences
Hamish Low (University of Oxford) – joint with Luigi Pistaferri
22 Apr 2021

Social Media and Protests in China
David Strömberg (Stockholm University) – joint with Bei Qin and Yanhui Wu
29 Apr 2021

Valuing Financial Data
Maryam Farboodi (MIT, Cambridge/MA) – joint with Adrien Matray, Laura Veldkamp and Venky Venkateswaran
6 May 2021

The Demand for Fact-Checking
Christopher Roth (University of Warwick)
20 May 2021

Organizational Design: Culture and Incentives
Willemien Kets (University of Oxford)
27 May 2021

Perceived and Actual Labor Market Risk
Georg Dünneker (Frankfurt University) – joint with A. Balleer, S. Forstner and J. Goensch
10 Jun 2021

No Help for the Heartland? The US Employment Effects of the Trump Tariffs
David Dorn (University of Zurich) – joint with David Autor, Anne Beck and Gordon Hanson
17 Jun 2021

Early-Career Discrimination: Spiraling or Self-Correcting?
Arjada Bardhi (Duke University) – joint with Yingni Guo and Bruno Strulovici
24 Jun 2021

Omnia Juncta in Un: Foreign Powers and Trademark Protection in Shanghais’s Concession Era
Claudia Steinwender (University of Munich) – joint with Laura Alfaro, Cathy Ge Bao, Maggie X. Chen and Junjie Hong
7 Oct 2021

Reconciliation Narratives: The Birth of a Nation after the US Civil War
Mathias Thoenig (University of Lausanne) – joint with Elena Esposito, Tiziano Rotesi and Alessandro Saia
14 Oct 2021

Blockchains, Liquid Democracy and Information Aggregation
Amrita Dhillon (King’s College London) – joint with G. Kotsialou and D. Xefteris
21 Oct 2021

Citation-Based Ranking

The tables below provide a citation analysis for our tenured faculty and our professorial/senior research fellows (n = 55)\(^1\) based on Thompson Reuters Web of Science (WoS) as of February 2022. This data-base is also used by the quality assurance unit of the university.

The table on the left shows the distribution of citations and the ranking of individuals by the total number of citations. The table on the right shows the distribution of citations and the ranking of individuals by Hirsch index \(h\). The lower part of each table indicates the names of the faculty members who rank first according to these metrics. In case of faculty members achieving the same scores, we rank those in ascending order by age.

---

\(^1\) The discussion here does not consider the law professors Hohenwarter-Mayr and Wellinger because publications in legal science follow different logics and patterns.
BEING INQUISITIVE PAYS OFF
Appendix
Faculty Journal List 2021

About the Faculty Journal List

The Faculty Journal List (FJL) is a dynamic, annually updated list that provides information on which journals are defined as Category 1 or Category 2 within the faculty. This definition was adopted in 2015 by the Research Commission and approved by the Faculty Board at the recommendation of the Scientific Advisory Board. The list is newly compiled at the beginning of every year and thus serves to retrospectively categorize the publications of the previous year.

For this purpose, the current individual lists of the different subject areas – citation indices SSCI (Social Sciences Citation Index) & SCIE (Science Citation Index Expanded) are taken from the Web of Science (Web of Science Core Collection – Web of Science Group) and ranked according to the respective Article Influence Scores of the journals.

clarivate.com/webofsciencegroup/solutions/web-of-science

Additionally, four so-called complementary lists are included in the ranking. These include:

• **Business:** Jourqual 3.0. This ranking is based on the judgment of professors in Business in the German speaking area. There are two top levels in this ranking: The "A+" journals are assigned to Category 1, the "A" journals to Category 2 of the FJL.

  vhbonline.org/vhb4you/vhb-jourqual/vhb-jourqual-3

• **Economics:** Handelsblatt-VWL-Ranking. All journals in EconLit are considered for the ranking. The weights are based on SCImago Journal Rank (SJR) values. We use the top two levels in their classification. The "A+" journals (weight 1.0) are assigned to Category 1, the "A" journals with (weight 0.208-0.859) to Category 2 of the FJL.

  forschungsmonitoring.org

• **Statistics:** A list compiled by the Australian Mathematical Society (AMS) is used here. The "A*" journals contained therein are listed as category 1, the "A" journals as Category 2 of the FJL.

  austms.org.au/Rankings/0104_AustMS_final_ranked.html

• **Finance:** The list compiled by the Amsterdam Business School (ABS) is used here. The "A+" journals included are listed as Category 1, the "A" journals as Category 2 of the FJL.

  abs.uva.nl/research/research-policy/research-policy.html

The Faculty Journal List (FJL) is a dynamic, annually updated list that provides information on which journals are defined as Category 1 or Category 2 within the faculty. This definition was adopted in 2015 by the Research Commission and approved by the Faculty Board at the recommendation of the Scientific Advisory Board. The list is newly compiled at the beginning of every year and thus serves to retrospectively categorize the publications of the previous year.

For this purpose, the current individual lists of the different subject areas – citation indices SSCI (Social Sciences Citation Index) & SCIE (Science Citation Index Expanded) are taken from the Web of Science (Web of Science Core Collection – Web of Science Group) and ranked according to the respective Article Influence Scores of the journals.

clarivate.com/webofsciencegroup/solutions/web-of-science

The top 10% of the journals in these individual lists are listed as Category 1 journals in the FJL. The remaining journals of the top 25% of the individual lists are assigned to Category 2 (see Figure 1).

![Figure 1: Categorization of Journals (citation indices SSCI & SCIE)](image-url)

The journals in our Faculty Journal List are listed alphabetically within the respective category:

- **Category 1 Journals** | 53
- **Category 2 Journals** | 66
